                        Re: Site Name: Marble Cliff
                              TDD No: F05-8710-062

Dear Mr. Kujawa:

Attached is a copy of my letter to Ronald W. Short of Ecology &
Environment, Inc. dated April 8, 1988.

We consent to affording Ecology and Environment access to our
site for inspection purposes on April 28, 1988, subject to the
provisions of that letter except the following:

        1.   We understand that the Ohio State equivalent of the
EPA is entitled to notice of the proposed site inspection and
that the Freedom of Information Act governs information
disclosures. Numbered paragraph one of my April 8, 1988 letter
is hereby modified to include these understandings.

        2.   You have indicated that EPA policy will not allow
contractors such as Ecology & Environment to enter into
indemnification agreements. Accordingly, we withdraw the demand
for indemnification as a condition of our consent to site access.
However, nothing herein is intended as a waiver of such legal
rights as we may have against Ecology & Environment if its
activities on or about the site cause damage to persons or
property.

I will have our Mr. Mark Thompson contact Mr. Short to arrange
for a meeting time and place on April 28th. If he should fail to

contact Mr. Short, Mr. Short should contact him at 614-224-0000; 614-486-6463 or 614-237-9093 to arrange for Mr. Thompson to accompany the Ecology & Environment representative(s) on the inspection.

Very truly yours,

DANIEL L. TWER
Associate General Counsel
